

Wall of fire

WF 6 Gas rotisserie

A 180-degree view on deliciously prepared birds, ribs or any other rotisserie meat will tempt your customers! The 6 horizontally positioned spits rotate in front of an open flame.

High-speed infrared elements direct intense heat into the product, enhancing the flavour and reducing cooking times. Each motorized spit runs independently with on/off switch, allowing you to cook a full or partial batch as needed. Removable trays allow for fat collection and can be used to add water for humidified cooking.

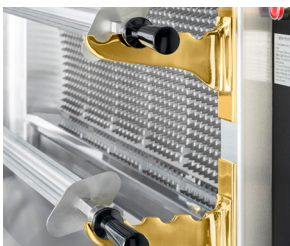

Features WF 6 Gas rotisserie

Top features

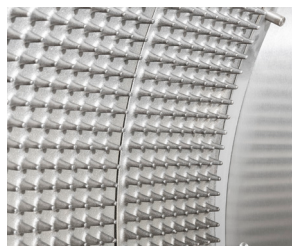

- Flame burners create an attractive appearance
