

# Simple and effective

Ventless hood

The features of the ventless hood are as simple as they are effective. With the ventless hood, it is not necessary to spend time and money on installing a central extraction system.

The ventless hoods have an advanced filtration process which removes virtually all smoke, grease particles and odors from the air stream and returns fresh air to ambient conditions. As a result, you'll not only **save on energy consumption** but also maintain a disturbance-free climate within your store.

**Unmatched flexibility** With the freedom to position the rotisserie anywhere within your store, you can optimize your ventilation setup according to your specific needs.

The ventless hood is a self-contained venting system and has a matching design with all our (electric) TDR's & LDR's.

LDR 8 S auto-clean with ventless hood

## Features ventless hood

### Top features

- Eliminates need for central extraction system
- Extracts smoke, fat and odors through a powerful filtration system
- Recirculates air through five charcoal filters
- Filters easily accessed from front of unit
- Flexibility - position the rotisserie anywhere in the store
- Noise level under 70 db
- Separate power connection

### Standard characteristics

- Easy to clean
- Easy to install
- Matching design with TDR and LDR, single and stacked units

### Accessories

- Charcoal filter, set of 5

See separate data sheets for detailed rotisserie information
