

Doc. nr. 9124593	Rev. 0	Registration form. Instruction change shelf angle MCC Hot	
----------------------------	------------------	---	---

The MCC Hot SS shelves can be mounted in two positions with a different angle, horizontal or at a 3° incline.

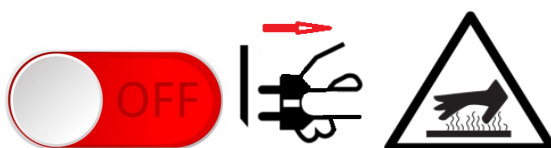

The default factory setting is as ordered by the customer, but it can be field adjusted.

Before starting this procedure, turn off the MCC and unplug the power connector from the wall outlet.

Let the shelves cool down before stating the procedure

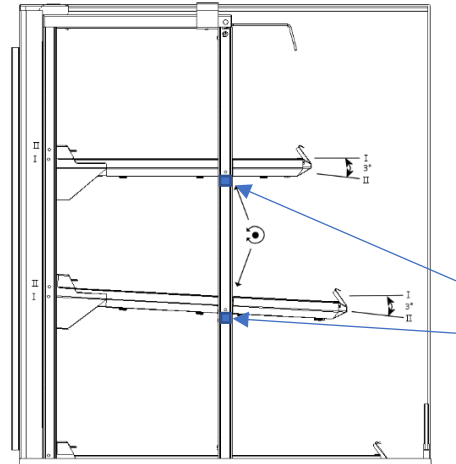

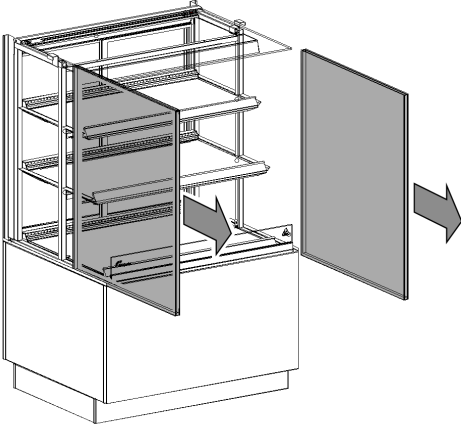

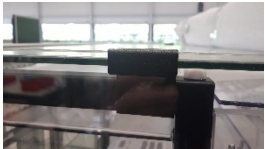

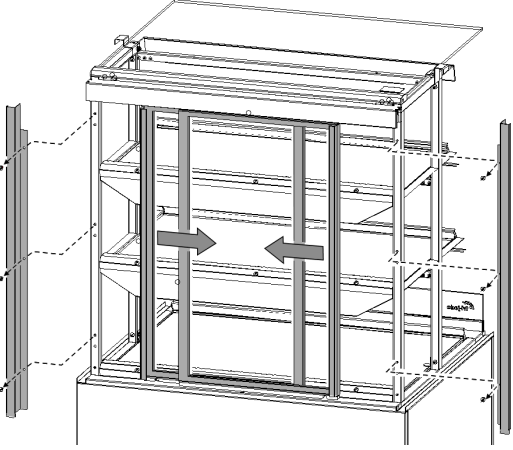

Tools: Philips screw driver (required) flat screw driver (recommended)

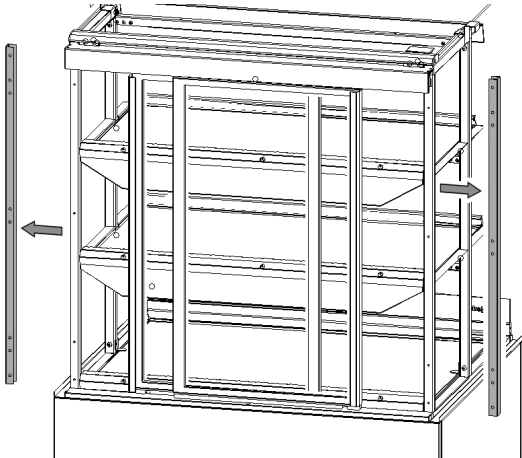

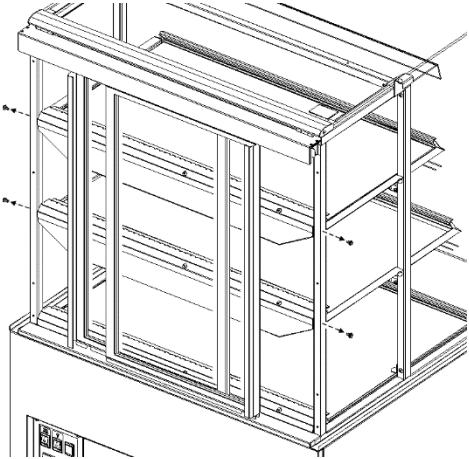

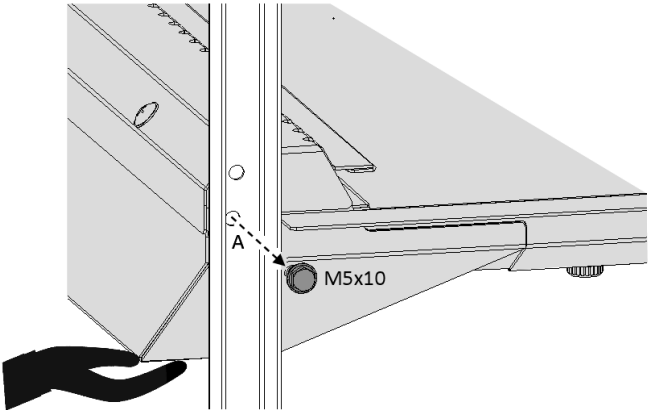

flat screw driver (recommended)
